

CRIMSON CRISS CROSS WIRE BRUSH POLLY PIG (CCC-WB)

Heavy-density foam body
(8-10 lb/ft³ - 128-160 kg/m³)

The Knapp Crimson Criss Cross Wire Brush Polly Pig is used when hard scale or paraffin deposits need to be removed from the pipe wall. It is manufactured using Knapp's exclusive K-Duro™ polyurethane foam (8-10 lb/ft³ density) and tough, durable crimson coating for the maximum in wear resistance, along with spiral straps of flame-hardened wire brushes for maximum scraping.. Designed for longer pipeline runs with little or no reduction in cross-sectional area, the Crimson Criss Cross Wire Brush Polly Pig offers the operator a flexible, low-cost alternative to steel mandrel pigs. Contact Knapp or a qualified representative before using a Crimson Criss Cross Wire Brush where line reductions are present.

*Note: The CCC-WB Polly Pig should not be used in non-metallic piping as it will physically scratch the pipe wall, creating an anchor point for future scale or deposit formation
