

STUD CLEANER POLLY PIG (SP)

**Heavy-density foam body
(9-10 lb/ft³ - 144-160 kg/m³)**

Knapp's patented Stud Cleaner™ Polly Pig has hardened steel studs embedded in a durable foam for removal of extremely hard scales in pipelines. The operator must use caution with the Stud Cleaner, as well as other Knapp Maximum Cleaning Series Pigs where short radius bends, reduced cross sectional area conditions, and low flow rates are present. It is manufactured using Knapp's exclusive K-Duro™ polyurethane foam (9-10 lb/ft³ density) and tough crimson coating for the maximum in wear resistance. Contact Knapp or a qualified representative before using a Red Criss Cross Wire Brush where line reductions are present.

*Note: The SP Polly Pig should not be used in non-metallic piping as it will physically scratch the pipe wall, creating an anchor point for future scale or deposit formation
