

BARE SWAB POLLY PIG (BS)

Light-density foam body
(1-2 lb/ft³ - 16-32 kg/m³)

The Knapp Bare Swab Polly Pig offers the pipeline operator a pig with maximum flexibility that is able to negotiate extreme reductions in cross-sectional diameter as well as tight bends in pipelines. Available with a flat or a tapered nose, the Bare Swab is the most flexible Polly Pig that Knapp manufactures. The open-celled polyurethane foam body of the Bare Swab is extremely absorbent and is frequently used as a drying pig to help remove any free water left after a pipeline dewatering project.
